DEVIO UCX QUICK-INSTALL BUNDLES
COMPLETE BUNDLES FOR MEETING ROOMS SMALL TO LARGE - ALL IN ONE BOX

Devio UCX provides a flexible, scalable foundation for professional meeting spaces across the organization. Designed to support rooms from huddle spaces to large conference environments, the platform combines dedicated UC compute, professional-grade audio processing, intuitive room control, and centralized management in a modular architecture that can adapt to the needs of each space. Organizations can standardize on a consistent conferencing experience while selecting the right cameras, microphones, loudspeakers, and peripherals for different room sizes and requirements.

For faster deployment, Devio UCX Quick-Install bundles package the core components needed for a complete meeting room into preconfigured solutions designed around common room types and audio coverage needs.

FEATURES

- **Scalable for every room size** — Standardize on one conferencing platform across huddle, small, medium, large, and extra-large meeting spaces.
- **Modular system architecture** — Match the right combination of compute, cameras, microphones, loudspeakers, and control to the needs of each room.
- **Professional-grade audio and video** — Deliver clear, natural communication with Biamp audio processing and high-performance conferencing peripherals.
- **Simplified room deployment** — Quick-Install Bundles package compatible system components together to reduce specification complexity and accelerate installation.
- **Consistent user experience** — Provide intuitive touch control and a familiar meeting experience across rooms throughout the organization.
- **Built for centralized management** — Support easier deployment, monitoring, and management across multiple rooms and locations through the broader Biamp Workplace ecosystem.
